

AMENDMENTS TO THE SPECIFICATION

Please insert the following new paragraph into the Specification prior to the section titled, "BACKGROUND OF THE INVENTION."

CROSS-REFERENCE TO RELATED APPLICATIONS

The present invention is a continuation of commonly-assigned, co-pending patent application serial number 10/252,907, entitled, "SYSTEM AND METHOD FOR FACILITATING A WINDOWS BASED CONTENT MANIFESTATION ENVIRONMENT WITHIN A WWW BROWSER," now issued as U.S. Patent No. 6,658,419, which is a continuation of patent application serial number 09/843,130, entitled, "SYSTEM AND METHOD FOR FACILITATING A WINDOWS BASED CONTENT MANIFESTATION ENVIRONMENT WITHIN A WWW BROWSER," now issued as U.S. Patent No. 6,535,882, which is a continuation of application number 09/234,297, entitled, "SYSTEM AND METHOD FOR FACILITATING A WINDOWS BASED CONTENT MANIFESTATION ENVIRONMENT WITHIN A WWW BROWSER," now issued as U.S. Patent No. 6,272,493, the disclosures of which are incorporated herein by reference.

Please replace the Abstract with the following new paragraph:

Facilitation of a windowed content manifestation environment (CME) within a web browser is disclosed. A server system is configured to serve a software system and associated content via an electronic data network. A web browser client operates within the electronic data network which instantiates a CME and is operative to receive the software system and associated content to produce at least one window object within the CME. Each window object is associated with a set of controllable attributes and are configured to manifest at least a portion of the content. The controllable attributes are capable of affecting the manifestation of the window objects by the web browser client within the CME.
